Jr., Joste N., McDonald G.A.;

coning, expression and sequence analysis of the gene encodir

coning, expression and sequence analysis of the gene encodir

by Surface-exposed protein of Rickettsia rickettsia.";

Microbiol. 3:1579-1586(1989).

Microbiol. 3:1579-1586(1989).

FUNCTION: THE 120 kDa SURFACE-EXPOSED PROTEIN IS A MAJOR

STRUCTURAL PROTEIN WHICH MAY PLAY A ROLE AS A RICKETTSIAL

VIRULENCE FACTOR AND/OR IMMUNOSEN DURING INFECTION.

SUBCELLULAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED

-i- FUNCTION: THE S-LAYER IS A PARACRYSTALLINE MONO-LAYERED ASSEMBLY
OF PROTEINS WHICH COAT THE SURFACE OF BACTERIA. THIS PROTEIN IS
CRITICAL FOR VIRULENCE.
-i- SUBCELLUILAR LOCATION: CELL WALL. THIS BACTERIUM IS COVERED BY A
S-LAYER WITH HEXAGONAL SYMMETRY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                  EMBL; J05577; AAA23032.1;

"Bridence for proteolytic cleavage of the 120-kilodalton outer
membrane protein of rickettsiae: identification of an avirulent
mutant deficient in processing.";

Infect. Immun. 60:159-165(1992).

-1- FUNCTION: THE 120 kDa SURFACE-EXPOSED PROTEIN IS A MAJOR
STRUCTURAL PROTEIN WHICH MAY PLAY A ROLE AS A RICKETTSIAL
VIRULENCE FACTOR AND/OR IMMUNOGEN DURING INFECTION.

-1- FUNCTION: THE 32 kDa BETA PEPTIDE MAY SERVE AS A MEMBRANE ANCHOR.

-1- FUNCTION: THE 32 KDA BETA PEPTIDE MAY SERVE AS A MEMBRANE ANCHOR.

-1- SUBCELJULAR LOCATION: CELL MAIL. THIS BACTERIUM IS COVERED BY A
S-LAYER WITH HEXAGONAL SYMMETRY.

-1- SUNCLULURA LOCATION TO THE RICKETISIAE OMPA/OMPB FAMILY.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               STRAIN=Wilmington;
